## History

Founded in 2012 by Mr. David Johnson, ABC Financials began as a boutique financial advisory firm with a clear vision to revolutionize financial services through innovation and client-centric solutions. Mr. Johnson, a seasoned financial expert with over two decades of experience, envisioned a firm that would offer personalized financial solutions tailored to each client's unique needs and goals. Starting with a small team of dedicated financial advisors and analysts, ABC Financials quickly established a reputation for excellence in wealth management and

investment advisory services. Over the years, the company expanded its service offerings and client base, steadily growing into a significant player in the financial services sector. Key milestones in our history include the launch of our proprietary financial technology platform in 2015, which transformed our service delivery and client experience, and the opening of new offices in major financial hubs across the country.
